BUREAU OF STATISTICS

GROSS DOMESTIC PRODUCT BY INDUSTRY

2008

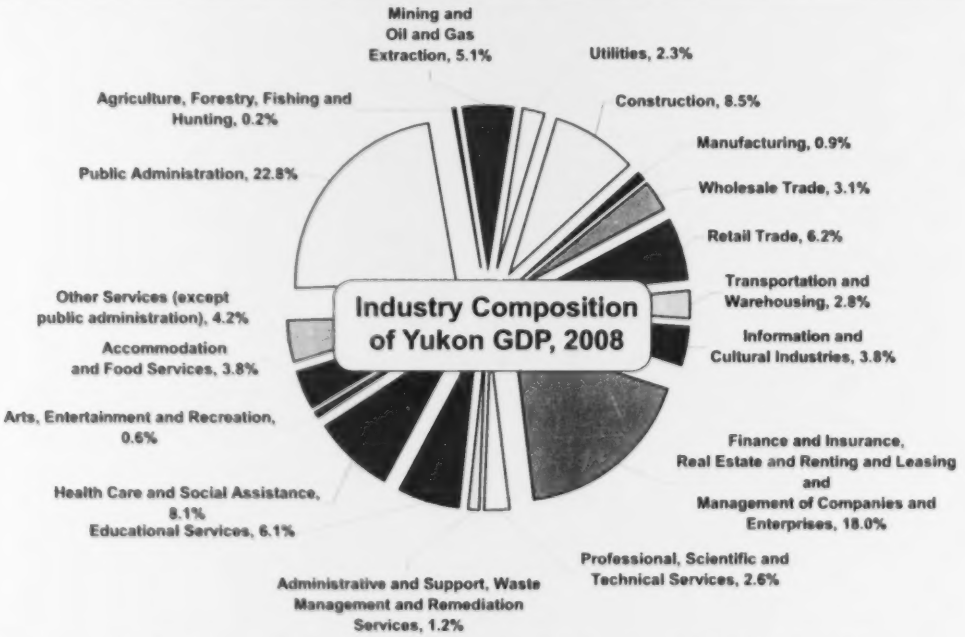
Total Yukon GDP by Industry, 2008	$1,424,600,000
Growth Rate from 2007 to 2008	4.3%

The Gross Domestic Product (GDP) of an industry represents the value added by labour and capital in transforming inputs purchased from other industries into output.

GDP is one of the primary measures used by decision-makers, financial and other institutions to evaluate the health of the economy. An increase in real GDP is interpreted as a sign that the economy is doing well, while a decrease indicates that the economy is not working at its full capacity. Real GDP is linked to other macro economic variables such as employment, economic cycles, productivity and long-term economic growth.

2008 Highlights

The Yukon's GDP by industry (at basic prices in chained 2002 dollars) rose $58.4 million, or 4.3%, in 2008 after a revised increase of 2.7% in 2007. In 2008, the largest dollar value increases were seen in the *mining and oil and gas extraction* sector and the combined *finance and insurance, real estate and renting and leasing and management of companies and enterprises* sector. The *mining and oil and gas extraction* sector increased by $26.0 million, or 56.3%, from a revised figure of $46.2 million in 2007 to $72.2 million in 2008. The *finance and insurance, real estate and renting and leasing and management of companies and enterprises* sector grew by $8.0 million, or 3.2%, from a revised total of $246.7 million in 2007 to $254.7 million in 2008. The third largest dollar value increase was seen in the *public administration* sector, which increased from a revised figure of $317.6 million in 2007 to $322.7 million in 2008, a difference of $5.1 million, or 1.6%.



Industry Composition of Yukon GDP, 2008
Mining and Oil and Gas Extraction, 5.1%
Utilities, 2.3%
Agriculture, Forestry, Fishing and Hunting, 0.2%
Construction, 8.5%
Manufacturing, 0.9%
Public Administration, 22.8%
Wholesale Trade, 3.1%
Retail Trade, 6.2%
Transportation and Warehousing, 2.8%
Other Services (except public administration), 4.2%
Information and Cultural Industries, 3.8%
Accommodation and Food Services, 3.8%
Arts, Entertainment and Recreation, 0.6%
Finance and Insurance, Real Estate and Renting and Leasing and Management of Companies and Enterprises, 18.0%
Health Care and Social Assistance, 8.1%
Educational Services, 6.1%
Professional, Scientific and Technical Services, 2.6%
Administrative and Support, Waste Management and Remediation Services, 1.2%

Note: Percentages are based on the sum of industry sector GDP figures, which do not equal the "Total Industry" figure.
See page 8 for further detail.

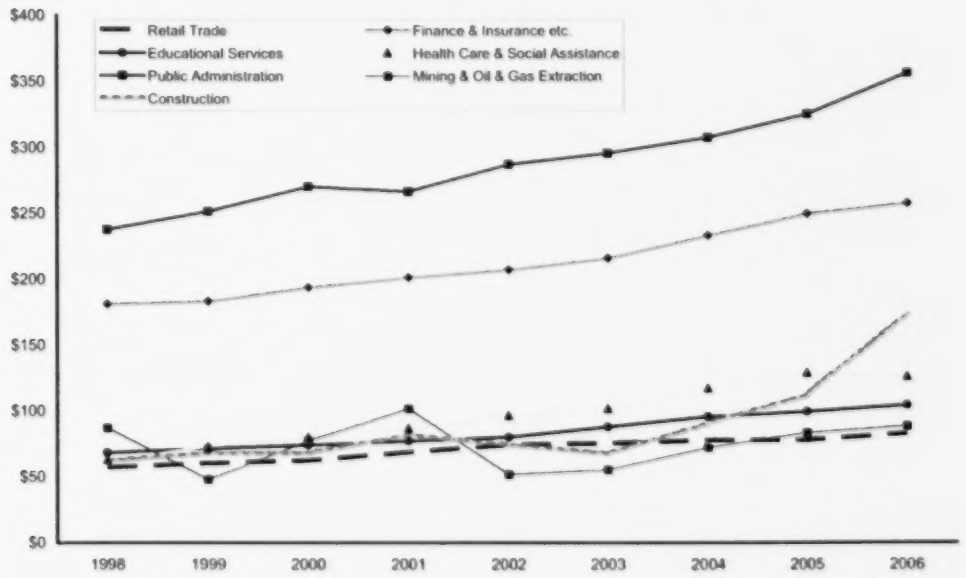
Nominal GDP by Selected Industries, 1998 to 2006

(millions of current dollars)



This analytical report presents Statistics Canada's latest estimates of the Yukon's Real GDP by industry in chained 2002 (**inflation-adjusted**) dollars for 2003–2008 and Nominal GDP by industry in current (**not adjusted for inflation**) dollars for 2003–2006. The figures are subject to revision.

Statistics Canada has adopted the chain Fisher volume index method of calculating the inflation-adjusted, or real, gross domestic product (GDP). The reason for the adoption of this method is twofold: it produces the most accurate measure of growth in GDP and its components; and the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP. Use of the chain Fisher index has also been recommended by the United Nations "System of National Accounts 1993", chapter 16.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate.

For example, the sum of the components of the Transportation & Warehousing Industry is not equal to the number given for that industry, just as the sum of the individual industry sectors is not equal to the number given for All Industries.

For more information, visit: http://www.statcan.gc.ca/nea-cen/gloss/iea-crd-eng.htm

The estimates contained in this publication are produced by Statistics Canada's Input-Output Division, and are reconciled with the overall provincial/territorial GDP figures produced by Statistics Canada's Income and Expenditure Accounts Division (IEAD). While the general concepts followed in compiling these estimates are consistent with those underlying the IEAD, there still remains conceptual differences between the GDP at market prices and GDP at basic prices. For more information, refer to: http://www.statcan.gc.ca/nea-cen/gloss/gdpind-pibind-eng.htm

All of the GDP estimates in this publication are measured in basic prices.

Note on the definition of the Public Administration Industry: Economic units (companies or establishments) are classified together in the same industry if they are engaged in the same or a similar kind of economic activity. The industrial grouping does not depend upon whether the activity is carried on by a government agency or by a business enterprise. Because so much of the activity commonly understood as 'government' is reallocated and assigned to its related industrial group in the industrial distribution, the 'Public Administration' industry shown in these tables provides a limited view of the full range of government activity. It includes only those establishments of government which clearly do not belong to any other branch of economic activity, but which are essentially concerned with general administration, the internal service agencies of the public sector, and defence.
